Info

You select the contact you want to make by clicking on the name here.

By switching to ON, the other party receives your name and makes the connection. This method is usually easier. Note: You must switch this to ON before switching ON Connection type to use this mode.

This shows that the connection is made

All your contacts must have the same network ID

Your network ID: babyphone

Always connected

You can also connect automatically. Go to the Settings and create a network ID name, so that those with this ID only can be contactable, and vice versa. The default is ID is babyphone.

Select this feature if you want to connect automatically. This must be done on one unit only. Make sure the Listen Mode is selected on the other unit

Before you begin you can create your own network ID for example JonesFamily, or simply leave it as bluetouch to begin with.

Click here to begin talking. Your contact's menu would automatically switch to this menu as well.

You can turn the mic on and off. In situations when you don't want the other party to hear you. Click here and a X will appear over the mic icon.

To stop the voice mode, click here

You can turn the speakerphone on and off by clicking here. An X will appear over the speaker icon if it is off.

Choose this menu to start the voice/talk mode

Click here to switch between the front and rear cameras if your unit has both.

To estimate the picture from the sending unit, click here. You will see live video. Click again to turn this off when you want to receive pictures.

You can also remotely get single shots by clicking here.

Click here to continuously download snaps from the sending unit.

Choose this menu to select the camera/picture mode
