

Bluetouch  
Communicator  
USER GUIDE

Go to the Settings and give your contact group a network ID name, so that those in this group only will be able to contact you, and vice versa. The default is bluetouch.

This feature is not yet

Before you begin you can create your own network ID for example JonesFamily, or simply leave it as bluetouch to begin with.

To make a connection, slide this switch to the ON position

Select this menu to go to the connection screen.

Search

You select the contact you want to make by clicking on the name here.

By switching to ON, the other party receives your name and makes the connection. This method is usually easier. Note: You must switch this to ON before switching ON Connection type to use this mode.

This shows that the connection is made
